Details:

Just a few minutes' drive from Es Trenc beach, this private residential complex is being built with a total of 69 ultra-modern apartments. The communal areas are equipped with a spacious saltwater swimming pool, Mediterranean gardens and a gym. A heat pump provides clean, renewable energy to power the air conditioning systems in the houses. These provide pleasant coolness in summer and warmth in winter.

The first construction phase is currently underway with 4 buildings of 8 residential units each. This is expected to be completed around 2024. A further 5 buildings will then be constructed in the second phase.

The following apartments will be built:

First floor 94.00 sqm 2 bedrooms 558,000 euros

First floor 115.00 sqm 3 bedrooms 648,000 euros

Second floor 94.00 sqm 2 bedrooms 698,000 euros

Second floor 115.00 sqm 3 bedrooms 769,000 euros

The apartments on the first floor will also have a covered terrace, while the apartments on the upper floor will have a balcony and a roof terrace.

Various floor plans are planned for the apartments, please ask us for more information.

High-quality materials will dominate in these apartments. They will also be equipped with hot/cold air conditioning and underfloor heating in the bathrooms.

Each apartment has its own parking space, with charging points for electric cars. The energy for this is supplied by photovoltaic systems, which are installed across the entire surface of the carports.
