Details:

This finca, completely renovated in 2021, stands on a very well-maintained, wonderfully-laid out plot of land of 4.500 sqm.

Its living space of approx. 165 sqm is spread over 2 levels. On the ground floor is a new fitted kitchen, a living/dining area with direct access to a terrace, a bathroom, and 2 double bedrooms. Oil-fired central heating and 2 fireplaces assure pleasant temperatures during the cooler winter months.

Housed on the first floor is a bathroom, and a further room with its own small terrace which could be used as a single bedroom or an office.

Also on the land is a separate laundry area and a large bbq area.

The finca has its own water source with new pump, new oil-fired central heating with Viessmann heating burner and Junkers warm-water boiler, an electric entrance gate, and a new power generator complete with photovoltaic system for a self-sufficient power supply and warm water. Added to that the complete canalisation system has been renewed and 2 new plastic underground tanks have been installed. The property also has a new entrance door and security locks, and high-quality safety-glass windows with mosquito protection have been fitted throughout the house.

This exceptional finca is completely legal with a new cedula valid until 2029.

Location & surrounding area:

The very pristine village Maria de la Salut, influenced by agriculture, is located in the Northeast of the island and is adjacent to the villages of Llubí, Santa Margarita, Ariany and Sineu. The main attraction of the village is the parish church of Mare de Deu de la Salut, which has given the place its name. In 2008 there were 2,161 inhabitants. One of the longest sandy beaches of Majorca is situated about 15 km north, in Can Picafort and Playa de Muro.
