Details:

A high-quality new construction project with 2 exclusive townhouses is being built in the town center of Santanyi. Construction is scheduled to start in February 2026. The location impresses with its tranquillity in a cul-de-sac and at the same time with its immediate proximity to the plaza and the historic town center.

Santanyi is located in the southeast of Mallorca and is known for its traditional architecture made of light-colored natural stone, the popular weekly market and an excellent infrastructure with restaurants, cafés and small boutiques. Its proximity to beautiful bays and beaches makes it one of the most sought-after residential areas on the island.

The 402 sqm plot will be developed with 2 townhouses, each with a construction area of approx. 220 sqm and extending over 3 floors. The centerpiece of each house is a spacious, private patio with pool, pergola and barbecue area as well as a sunny terrace.

On the first floor is the entrance area with adjoining garage and electric gate as well as the open-plan living and dining area with fireplace and modern, open-plan kitchen. On the second floor there are 2 bedrooms with fitted wardrobes and en suite bathrooms, one of which has a balcony. The third floor houses the master bedroom with dressing room, bathroom and balcony with views of the church of Santanyi.

The architecture combines timeless modernity with typical Mallorcan elements. Natural stone floors, exposed ceiling beams and custom-made wooden fittings meet clean lines and an open-plan concept. Underfloor heating and cooling systems via air heat pumps ensure year-round comfort, and a photovoltaic pre-installation is planned. An elevator connects all floors.

As the project is still in the planning phase, there are attractive options for individual design. We would be happy to advise you personally on this special new-build project in Santanyi.
